

FUND UPDATE

kōura KiwiSaver Scheme : Rest Of World Equities Fund

Fund Update for the quarter ended **30 September 2022**

This update was first made publicly available on 28 October 2022.

What is the purpose of this update?

This document tells you how the Kōura Wealth KiwiSaver Rest of World Equities Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Kōura Wealth Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

This Fund provides exposure to the share markets of Europe, Australasia, Singapore, Hong Kong, Japan and Israel. The Fund will invest in underlying funds to provide this desired exposure. The Fund expects to deliver a negative return once in every 3-4 years.

Total value of the fund (\$)	\$6,592,728
Number of investors in the fund	1388
The date the fund started	23 October 2019

What are the risks of investing?

Risk indicator for the Rest of World Equities Fund¹:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://www.sorted.org.nz/guides/kiwisaver-which-fund-suits>.

Note that even the lowest category does not mean a risk-free investment, and there may be other risks that are not captured by this rating. This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years ended 30 September 2022¹. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past Year
Annual Return (After deductions for charges and Tax)	(16.26%)
Annual Return (After deductions for charges but before Tax)	(15.99%)
Market index annual return (Reflects no deduction for charges and tax)	(20.05%)

The Market index for this fund is the Morningstar Developed Markets ex North America GR (50% Converted to NZ Dollars and 50% Hedged to NZ Dollars). Morningstar convert each underlying currency in the fund into US Dollars and Koura are responsible for the conversion from US Dollars to NZ Dollars.

Annual return graph ^{2,3}

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the return since the fund started, up to 30 September 2022 on an annualised basis.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) 28% tax for an individual New Zealand resident. Your tax may be lower. The market index return reflects no deductions for charges and tax.

What fees are investors charged?

Investors in the Rest of World Fund are charged fund charges. In the year to 31 March 2022, these were:

	% of net asset value
Total Fund charges	0.63%
Which are made up of:	
Total Management and administration charges	0.63%
Including:	
Manager's basic fee	0.51%
Other Management and administration fees	0.12%
Total performance based fees	0.00%
Other charges	Dollar amount per investor
Administration Fee	\$30 per year

All fund charges are exclusive of GST.

Investors are not charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds).

Example of how this applies to an investor

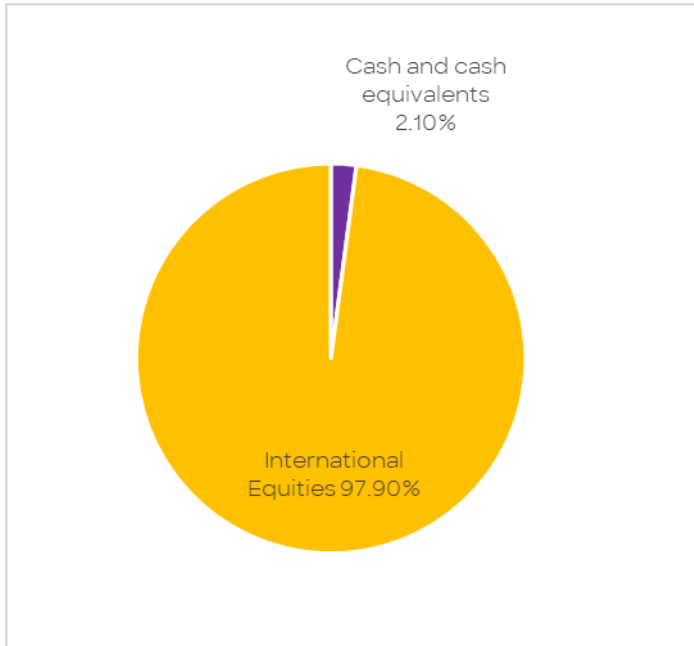

Small differences in fees and charges can have a big impact on your investment over the long term.

Lily had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Lily incurred a loss after fund charges were deducted of \$1,626. (That is 16.26% of her initial \$10,000). Lily was also charged \$30.00 in administration charges. This gives Lily a total loss after tax and charges of \$1,656 for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual investment mix

Target investment mix

Cash and cash equivalents	1%	International equities	99%

Notes

1. As the fund started on 23 October 2019, actual returns for the fund are not available until then. To calculate the risk indicator for the five-year period ending 30 September 2022, market index returns have been used up to 31 October 2019 with actual fund returns used for the balance of the period. As a result of those market returns, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
2. Performance has been calculated from 23 October 2019, when the first investment was made in the fund.
3. The bar chart show fund returns after the deduction of fees and taxes, however, the market index returns are shown before any fees or taxes are deducted.
